

Environmental and Sustainability Statement

EST Edelstahl-Schneidtechnik GmbH

Responsibility for the Environment and Sustainability

EST Edelstahl-Schneidtechnik GmbH is committed to the responsible and sustainable use of resources, the environment, and energy. As a modern company in the metalworking industry, we consider environmental protection to be an integral part of our corporate responsibility and our daily activities.

We strive to continuously minimize the environmental impact of our business activities and to promote sustainable solutions along our entire value chain. This commitment is anchored in our Code of Conduct as well as in our internal corporate processes.

Our Environmental Principles

EST Edelstahl-Schneidtechnik GmbH is committed to:

- introducing and continuously improving environmentally friendly practices,
- reducing waste and conserving natural resources,
- preventing environmental pollution,
- complying with all applicable environmental laws, regulations, and relevant standards,
- reducing emissions and energy consumption,
- promoting a sustainable circular economy through recycling and reuse of materials,
- working with suppliers and business partners who share our values regarding environmental responsibility and sustainability.

Implementation at EST

To achieve these objectives, EST implements, among others, the following measures:

Energy Efficiency

- Demand-based operation of energy-intensive systems such as cutting systems, compressors, and high-pressure pumps.
- Regular review and optimization of energy consumption.
- Conducting energy audits and continuously developing existing energy management measures.

Waste and Resource Management

- Careful separation and proper disposal of scrap, slag, blasting media, plastics, paper, cardboard, wood, and other waste materials.
- Promoting the reuse of recyclable materials and recycling materials.
- Ongoing monitoring and control of disposal processes.

Emissions and Environmental Protection

- Monitoring and control of pollutant emissions.
- Conducting workplace measurements to ensure compliance with legal requirements.
- Implementing appropriate measures to protect the environment and employees.

Legal Compliance

- Consistent compliance with all relevant environmental legal requirements.
- Regular review of internal processes to ensure environmental compliance.
- Continuous improvement of existing environmental measures.

Cooperation with Business Partners

We expect our suppliers and business partners to demonstrate a comparable commitment to environmental and sustainability issues. When selecting and working with suppliers, we take compliance with applicable environmental standards into account and support partnerships that contribute to sustainable development.

Continuous Improvement

For EST Edelstahl-Schneidtechnik GmbH, sustainability is not a one-time project, but an ongoing improvement process. Through regular review of our processes, raising awareness among our employees, and implementing economically and technically appropriate measures, we continuously work to further improve our environmental performance and reduce our ecological footprint.
